

The Notes Recycler Application is intended for users to write notes to keep information. Users will be able to write, edit, and save notes at any time

Components of the application:

- The saved notes will be combined into a collection where they can be tapped and edited at any time
- The collection has a recycler component that can be dragged to see more notes
- Notes are saved onto json upon closing the application and reloaded when the app is launched again
- Deletion of one note can be done by long-pressing the note and having a dialog pop-up
